Profile

Junior–Middle iOS Developer with hands-on experience building and shipping real iOS applications using Swift, SwiftUI, and UIKit. Product-minded indie developer who enjoys turning ideas into polished apps used by real users. Strong focus on SwiftUI architecture, clean code, and scalable app design, with practical experience in App Store distribution, subscriptions, and user-driven iteration. Open to relocation and international opportunities.

Pet Projects

Anotherlife — Habit Tracker (Published App on 13.01.2026)

iOS App | Swift, SwiftUI, CoreData, App Store Distribution

Personal / Indie Project

App Store: <https://apps.apple.com/us/app/anotherlife-habit-tracker/id6752122842>

- Designed and developed a full-featured habit tracking application from scratch, covering the complete lifecycle from idea to App Store release
- Built a SwiftUI-based architecture with offline support and cloud synchronization
- Implemented authentication using Firebase
- Integrated subscriptions and in-app purchases via App Store Connect
- Developed challenges, leaderboards, streak systems, and analytics dashboards to drive user engagement
- Ensured full App Store compliance, including privacy policy, DSA requirements, and data handling
- Shipped and maintain a production app with ~100 downloads and ~50 active users across Poland and Kazakhstan
- Actively iterate on features and UX based on real user behavior and feedback

Friscora – AI-Powered Personal Finance App

iOS App | SwiftUI, MVVM, CoreData, AI Integration

January 2025 – Present (TestFlight)

- Designed and developed a personal finance iOS application focused on expense tracking, analytics, and intelligent insights
- Implemented a transaction import pipeline allowing users to upload bank statements (PDF), extract transactions, categorize data using an AI-based system, and preview results before saving
- Built a modular AI architecture with a mock AI service for development, designed for seamless future integration with cloud-based LLM APIs
- Applied MVVM architecture with SwiftUI and Combine to ensure scalability, testability, and clear separation of concerns
- Implemented local persistence using CoreData with automatic dashboard updates
- Focused on fintech-grade UX, including editable AI results, user confirmation flows, and transparency in categorization

Recipe Finder App

iOS App | UIKit, REST APIs, JSON Parsing

- Developed a recipe discovery application consuming data from TheMealDB API
- Implemented category-based navigation, detailed recipe screens, and dynamic image loading
- Strengthened skills in asynchronous networking, API integration, and JSON parsing

Work Experience

Lionbridge · Warsaw, Poland09/2025 - Present

QA Performance & Functional Tester

- Measure and benchmark game performance (FPS, Memory, CPU/GPU load) and identify bottlenecks impacting stability.
- Create detailed test reports using Jira, following structured documentation from Confluence.
- Improved test coverage by 20% by updating test cases and identifying recurring issues in daily builds.

Citibank · Warsaw, Poland01/2025 - 07/2025

Compliance AML KYC Analyst I

- Performed Customer Due Diligence (CDD), periodic reviews, and onboarding checks for corporate clients.
- Processed 200+ KYC files monthly with 90%+ accuracy, consistently hitting strict SLAs.
- Flagged unusual behaviour and escalated high-risk cases according to AML and FATF guidelines.

Tech Stack

iOS Development: Swift, SwiftUI, UIKit, MVVM, Combine
Persistence & Backend: CoreData, Firebase (Auth, Firestore)
App Distribution: App Store Connect, TestFlight, In-App Purchases, Subscriptions, App Store Review & Rejection Handling
Other: Git, GitHub, Xcode, REST APIs, JSON, CocoaPods,
Basic knowledge: Python, SQL

11/2022 - 11/2024

Soft Skills

- Strong ownership and product thinking
- Attention to detail and UI/UX quality
- Ability to ship, iterate, and maintain production apps
- Clear communication and openness to feedback
- Fast learner with strong self-driven mindset
- Effective time management and task prioritization

Education

Bachelor’s Degree in Computer Engineering

Vistula University, Warsaw, Poland

Oct 2020 - Nov 2024

- Strong technical foundation in object-oriented programming, databases, and software engineering
- Academic exposure to Java and basic Python
- iOS-related projects: Calculator App, BMI Calculator, Weather App Clone

Certifications

iOS & Swift – The Complete iOS App Development Bootcamp, London App Brewery

iOS Development Using UIKit & Swift (Project-Based Learning)

Complete Web & Mobile Designer: UI/UX, Figma
